Presentation: Cell Phone Boot Camp

Presentation Outline

- Types of Cell Phones
- Adding Contacts
- Calling
- Receiving Calls
- Texting
- iPhone/iPad
- Questions?

Types of Cell Phones

- There are two main types of cell phones:
  - Smartphones: an advanced kind of phone that has more functioning than a regular one, such as touch screen capability and games
    - *Examples*: iPhone, Android
  - Feature Phones: basically any kind of phone that is not a smartphone
    - *Examples*: flip phones

Adding Contacts

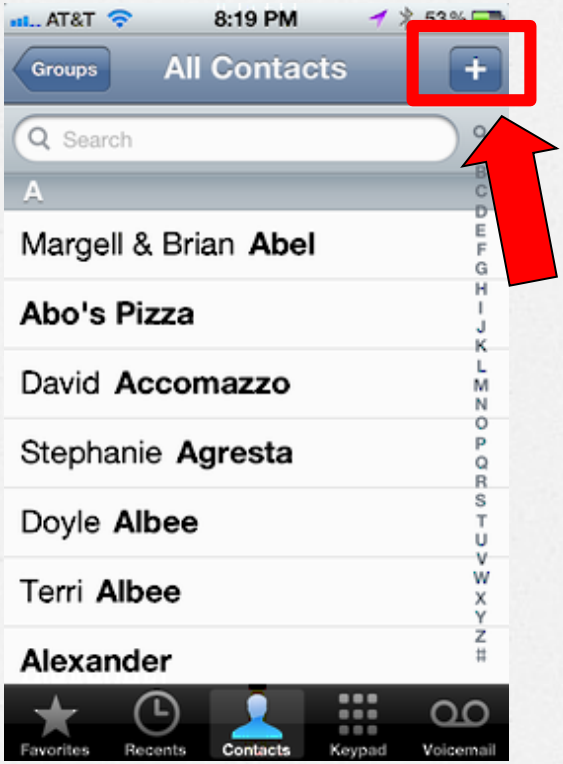
- A contact is a person whose information is stored in your phone, including phone number and name.

Adding Contacts Step 1

- To create a contact in your phone, first find the “Contacts” button.

Adding Contacts Step 2

- Next, find an “Add Contact” button.
- On the iPhone, it is in the upper right hand corner.
- On a feature phone, it is usually in the bottom left corner.



Adding Contacts Step 3

- You will be taken to a screen where you will be prompted to add information in boxes about your contact.
- Fill these boxes in.

Benefits of Contacts

- You know who is calling you.
- It is easier for you to call others.

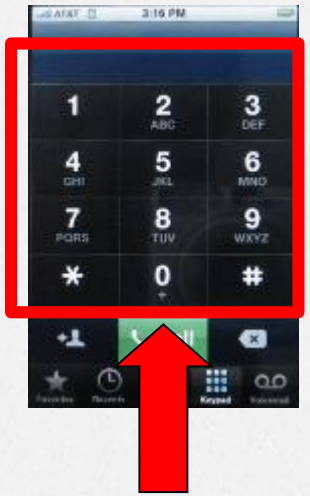
vs.

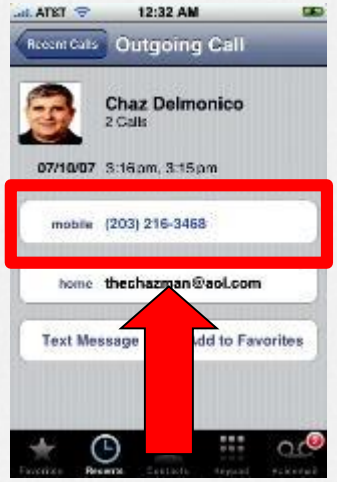
Calling Step 1

- Open the “Phone” application on your cell phone.
- For a feature phone, it is usually just the keypad already on the phone.

Calling Step 2

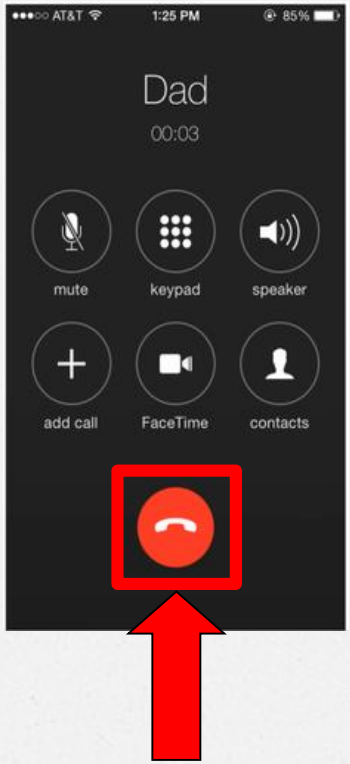
- You have two options: (1) click on the contact you want to call, (2) type in the number of the person you want to call.





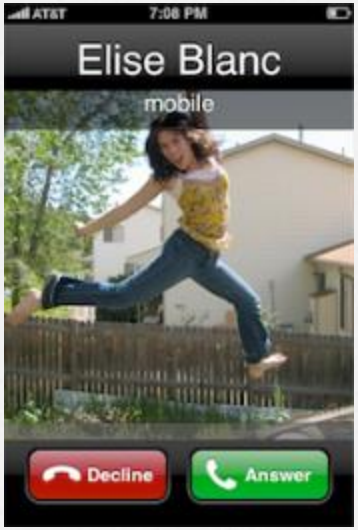
Calling Step 3

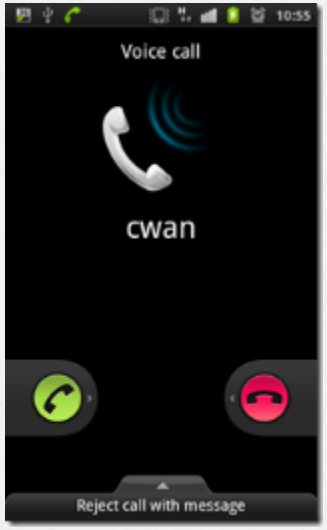
- Once you finish the call, you can stop by clicking the “End” button.



Receiving Calls Step 1

- When you receive a call, your phone will automatically give you a sound alert (“ring”).





Receiving Calls Step 2

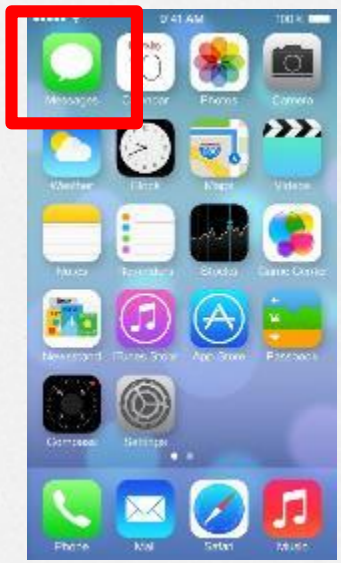
- You can choose if you want to answer or not. If you do not recognize the phone number, **<u>do not accept the call.</u>**

Texting

- Texting is similar to an email.
- It is basically written communication through short messages.
- This is one of the best ways to communicate with your younger relatives.

Texting Step 1

- Open the "Messaging" application on your cell phone.

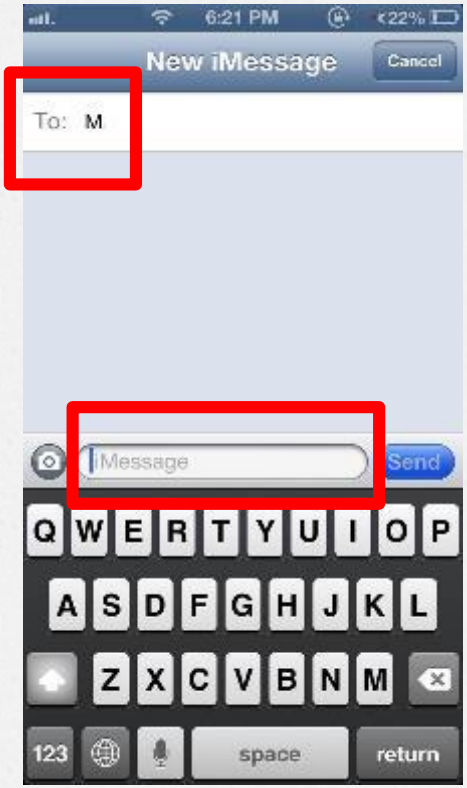


Texting Step 2

- Click on “New” in the upper right hand corner (usually).

Texting Step 3

- In the “To” field, write the name or cell phone number of the person you want to contact.
- In the “Message” field, write the message.



Texting Step 4

- Click “Send” and you are done!
- Your phone will notify you if the other person texts back.

Texting Fun

- Since texting is very informal, there are many acronyms and shorthand phrases that are used to convey words.
- Let’s have some fun by trying to guess a few.

ur

- your

thx

- thanks

lol

- laughing out loud (used for happy emotion)

cya

- see you (later)

ily

- I love you

jk

- just kidding

iPhone/iPad

- Now let's focus specifically on the iPhone and iPad.

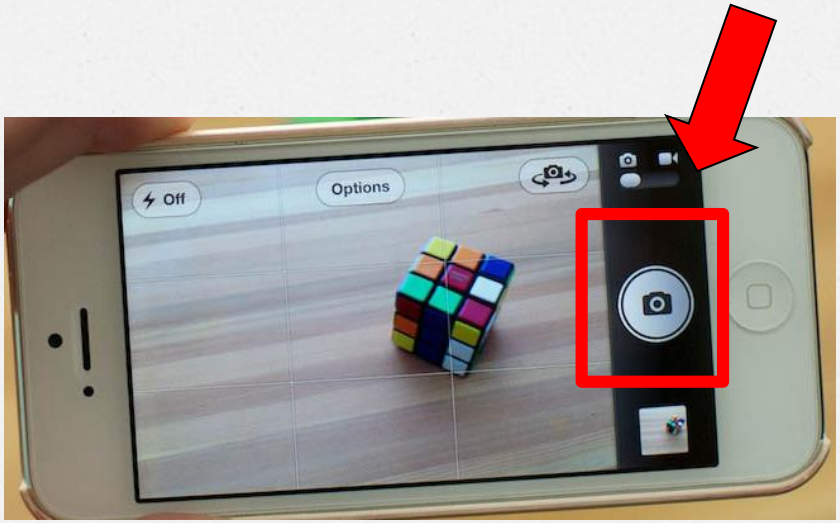
Cool Uses of the iPhone and iPad

Camera/Video Step 1

- Go to the “Camera” app.

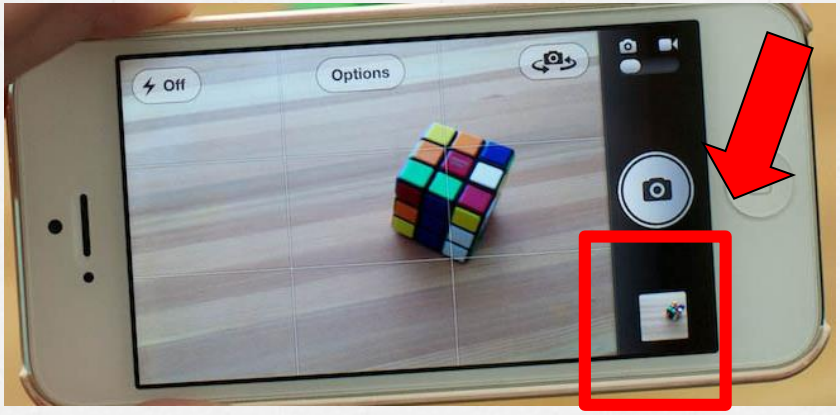
Camera/Video Step 2

- Look at the object/person you want to take a picture/video of and click the white or red button in the bottom middle of the screen.



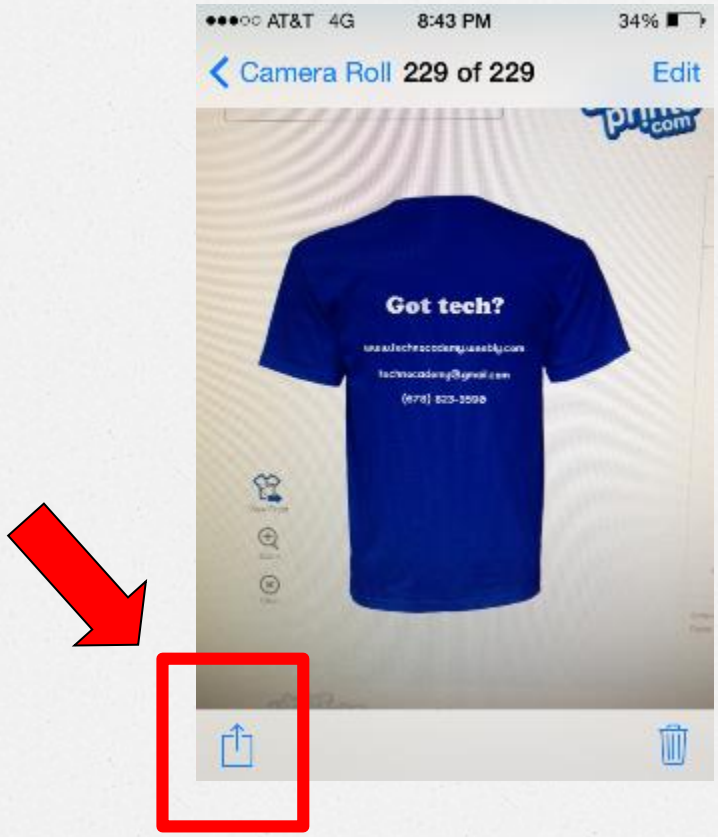
Camera/Video Step 3

- Once you take a picture, send it to someone by clicking the picture on the bottom left.



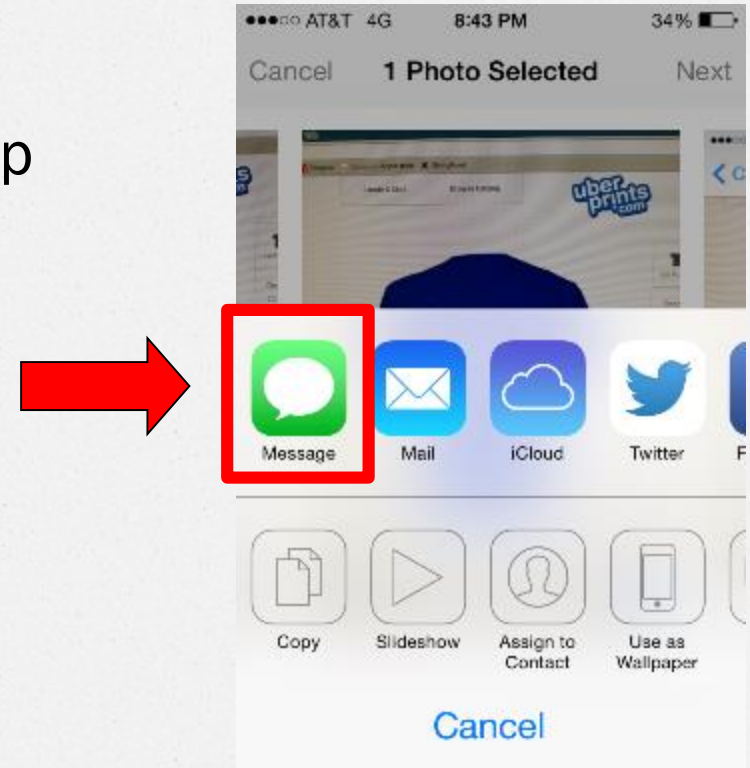
Camera/Video Step 4

- Next click on the button on the bottom left that has an arrow.



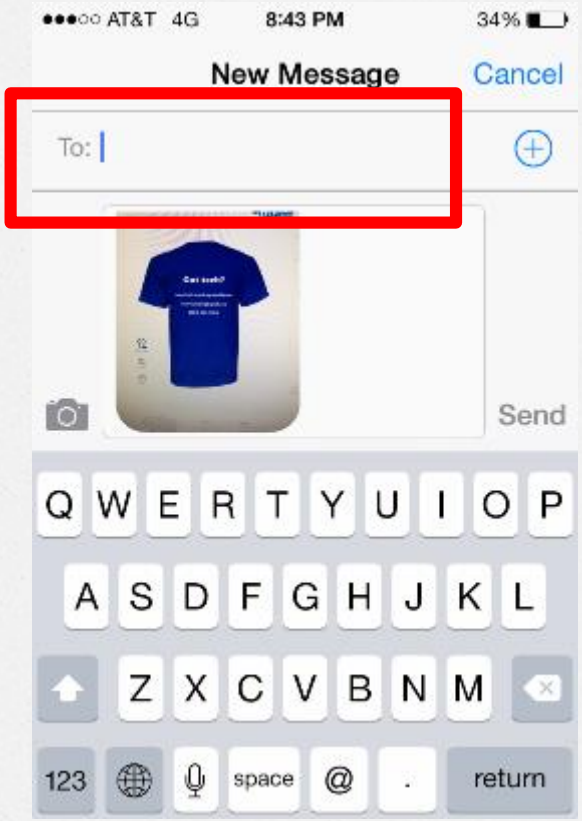
Camera/Video Step 5

- Click on the "Messaging" app



Camera/Video Step 6

- Now your photo becomes the body of your text message. In the "To" field, type in the name of the person you want to send to and then send it.



Messages

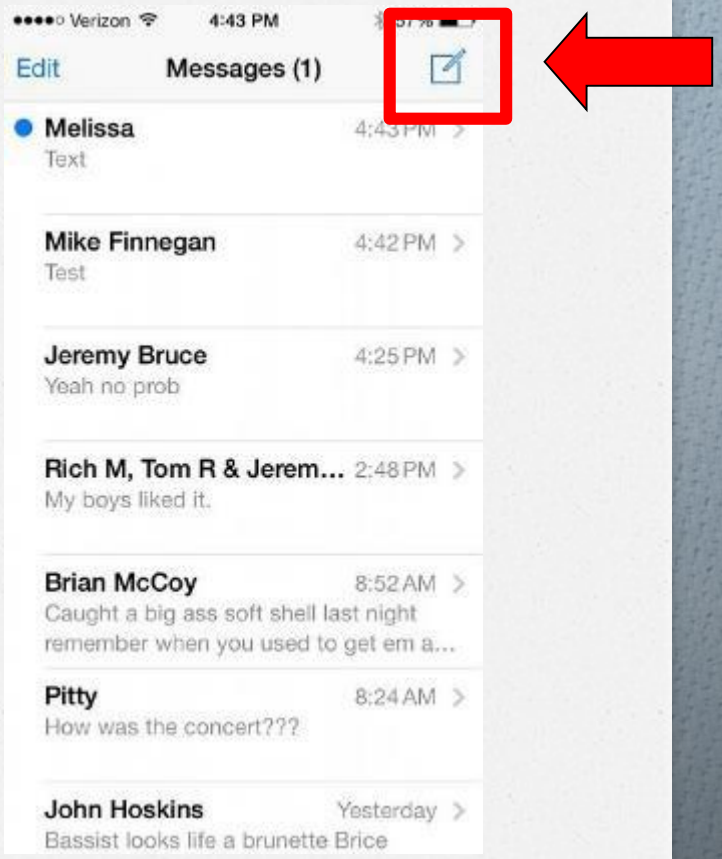
- This is the “texting” app.
- You can send short messages to other people, similar to email.

Messages Step 1

- Open the "Messages" app.

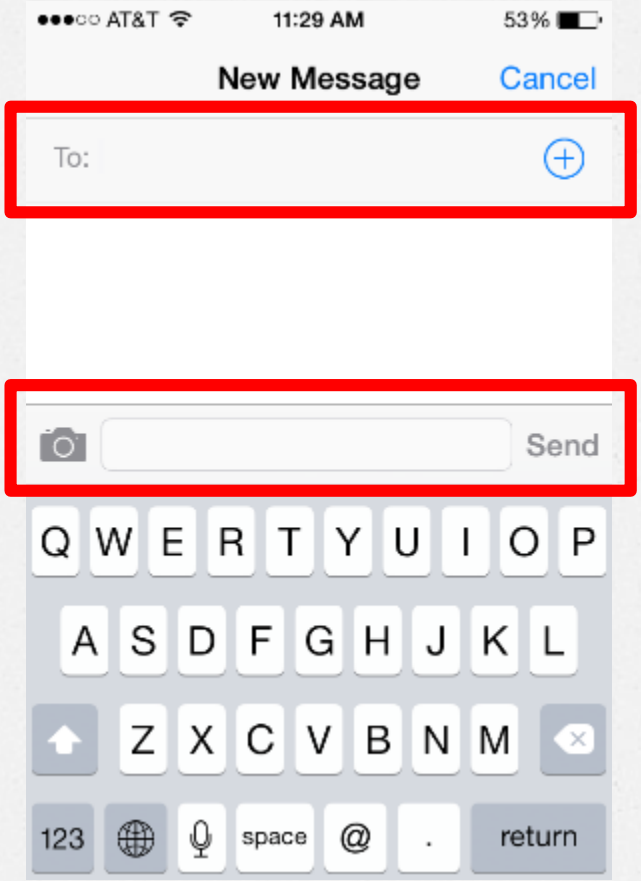
Messages Step 2

- You now see a list of "conversations."
- To start a new message, click the blue button on the top left.



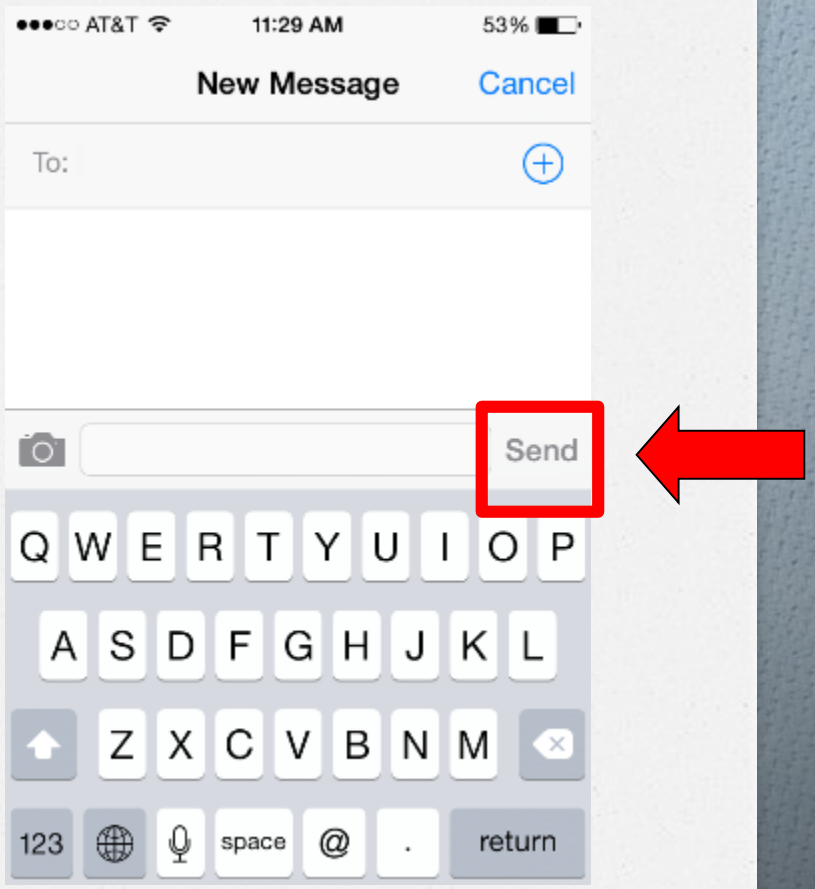
Messages Step 3

- In the “To” field, enter the phone number of the person to send to.
- In the box next to send, enter your message.



Messages Step 4

- Click the “Send” button when you are done!

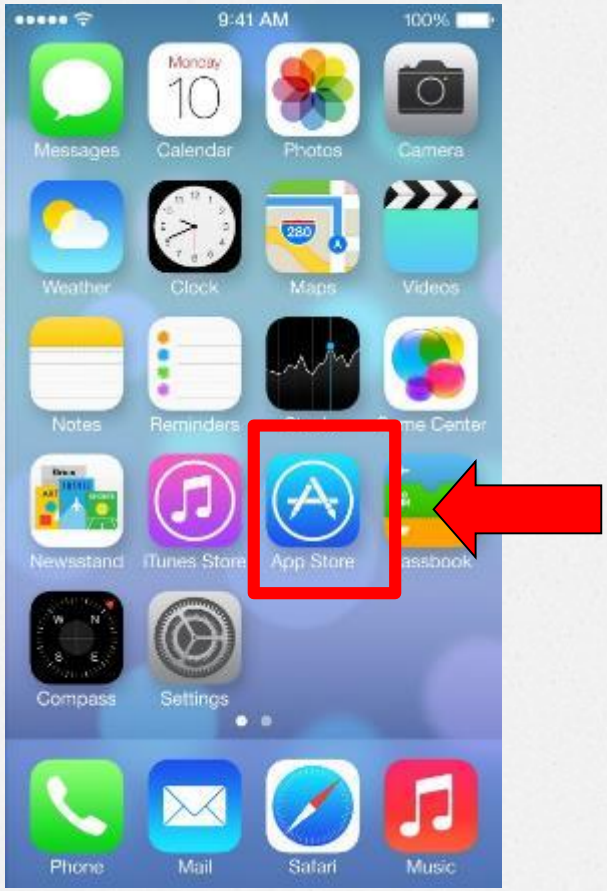


App Store

- With the “App Store” on your device, you can get many different kinds of games or puzzles for free.
- Some exciting ones include:
  - Sudoku
  - Riddles
  - Crossword Puzzles
  - Word Games
  - Card Games
- You can play many games with other people as well, like scrabble with your family in New York.

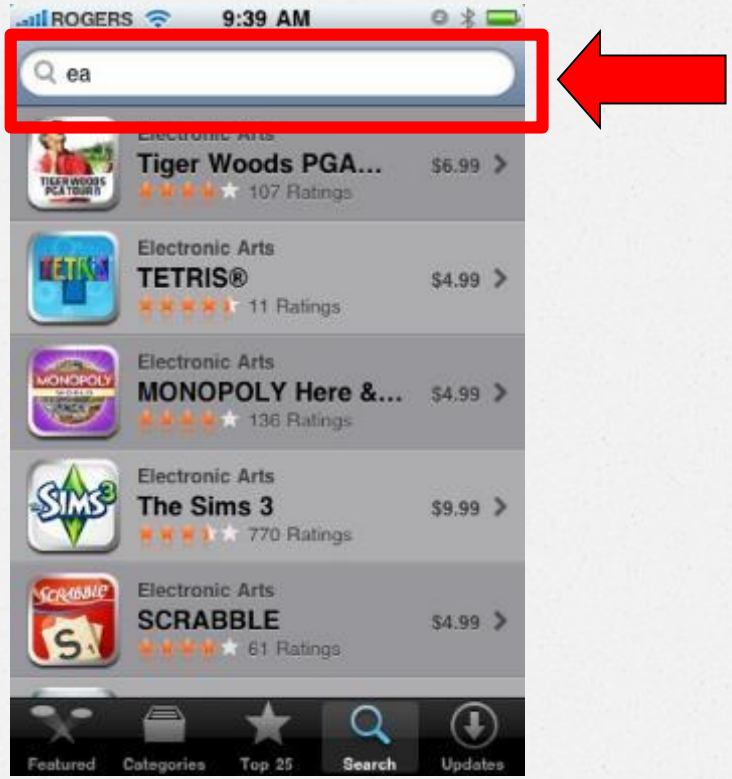
App Store Step 1

- Click on the “App Store” button.



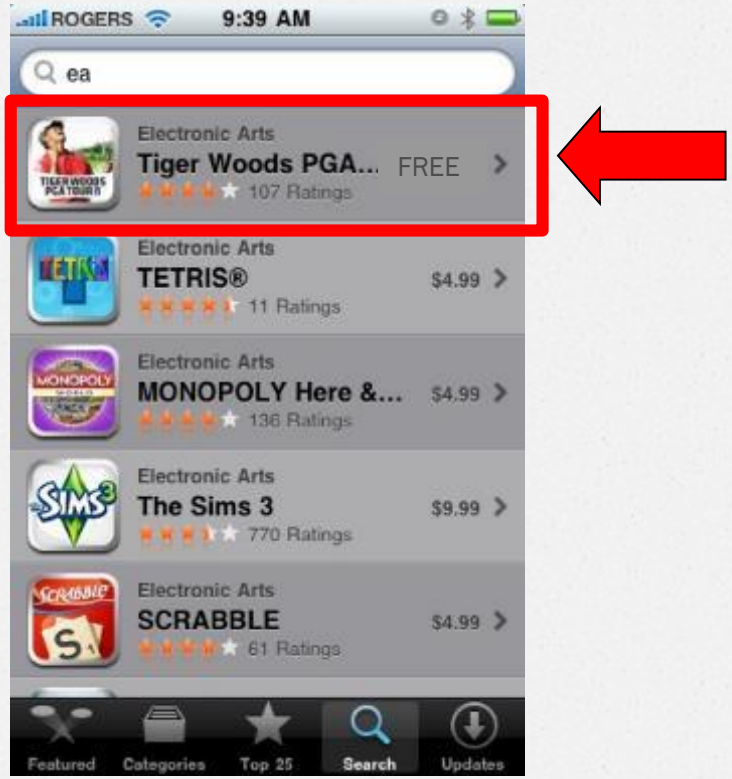
App Store Step 2

- On the “Search” tab at the bottom, type in whatever kind of app you wish to find.



App Store Step 3

- Click on an individual app you want (make sure it says “FREE”) and click download.



App Store Log In

- To download an app, your iPhone/iPad will ask you for a username and password.
- Type in the following:

username: ---

password: ---

Email and FaceTime

- With the iPhone/iPad, you can look at your email and do video conferencing.
- Both of these topics are discussed in other presentations of ours.

iMovie

For iPhone and iPad

What is iMovie?

- iMovie is an app on the iPhone/iPad that you can use to make “movies.”
- This can range from photos to videos.
- You can even add text!

iMovie App

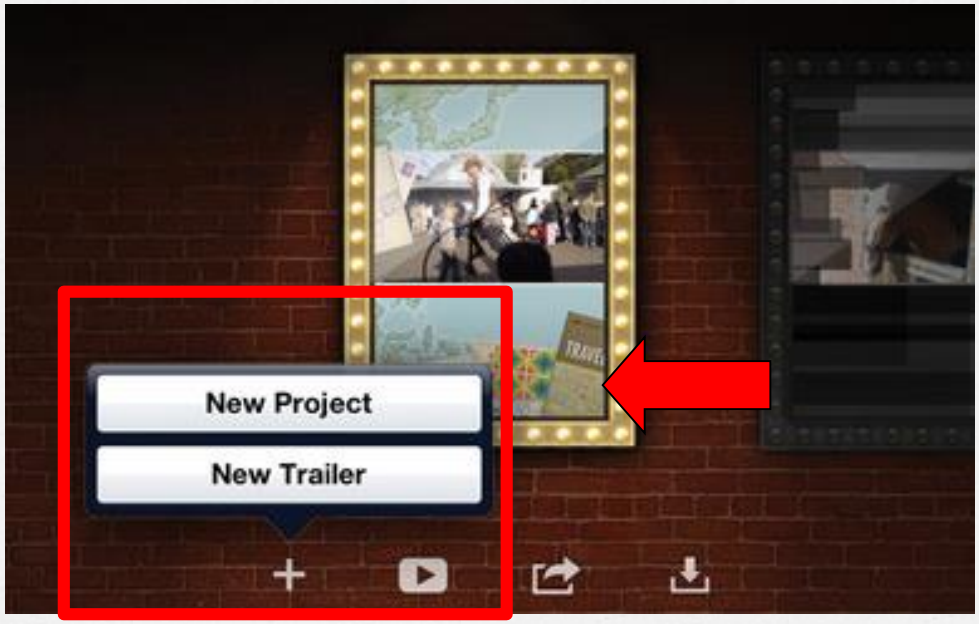
- You should probably have the iMovie app already downloaded on your device. If not, ask a volunteer for help.
- It looks like this:

iMovie Step 1

- Open the app.

iMovie Step 2

- Click the “+” button.

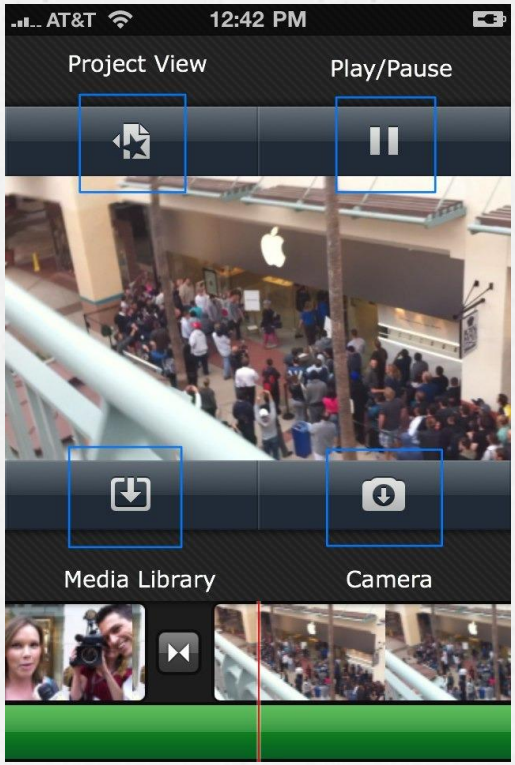


iMovie Step 3

- Select the kind of theme you want for your movie.
- Leave “Theme Music” on.

iMovie Step 4

- Press the button in the upper right to view your project.
- Use the bottom two buttons to add new video (left) or photos (right) to your movie.



iMovie Step 5

- Move the red line at the bottom to the place in your movie where you want to add new photo/video.
- You can drag-and-drop new photo/video to your movie.
- The green bar is the music in your movie.

iMovie Step 6

- Once you finish the movie, click the Project List button in the bottom left corner.
- Then, click the export button.

Summary

- For a quick wrap-up of the material you may need in the future, please refer to the “Cell Phone Survival Guide” and “Using the iPhone and iPad” tutorials.

Questions?

Thank you!

- If you ever have any questions regarding cell phones or any other topics, please feel free to send an email to:
