Presentation: Facebook and Social Media

Presentation Outline

- Intro to Social Media
- General Uses of Social Media
- Facebook
  - Setting Up a Facebook Account
  - Adding Friends
  - The Feed
  - Posting
  - Private Messaging
- Safety on Facebook
- Questions?

What is Social Media?

- Social media is a free, simple way in which you can communicate with other people around the world.
- Social media allows you to share your own and view others' pictures and messages.
- A great part about social media is that only people you know can view your information and photos.

General Uses of Social Media

- There are many reasons why social media would be a great tool for you:
  - You can communicate with friends and family around the world.
  - You can catch up with old friends.
  - It's a free and simple way to stay connected with your family and friends all at once.
  - You can keep others up to date about your own life.

Facebook

Differences of Facebook

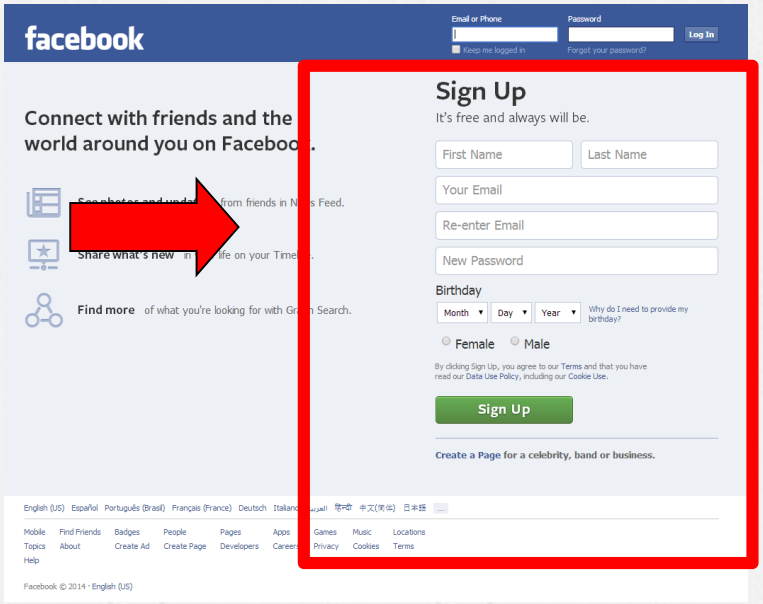
- Facebook is the most popular and general of the social media websites.
- Facebook allows you to add “friends” with whom you can share and view photos and other information with.
- Facebook is unique in that it allows you the most flexibility for sharing not only messages, but also photos, videos, and private messaging with other people.

Creating an Account

Facebook

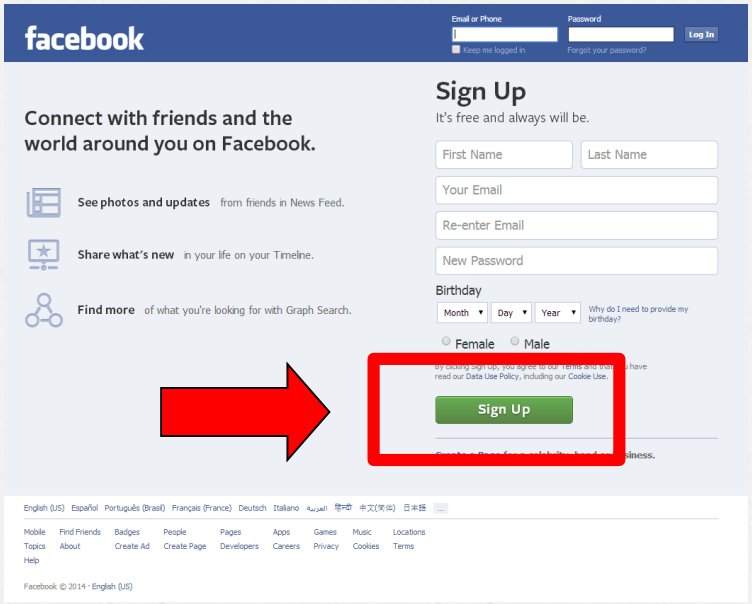
Setting Up a Facebook Account Step 1

- Open www.facebook.com on your web browser.
- Look at the “Sign Up” part.



Setting Up a Facebook Account Step 2

- Fill out all the information.
- Once you finish, click the green “Sign Up” button.

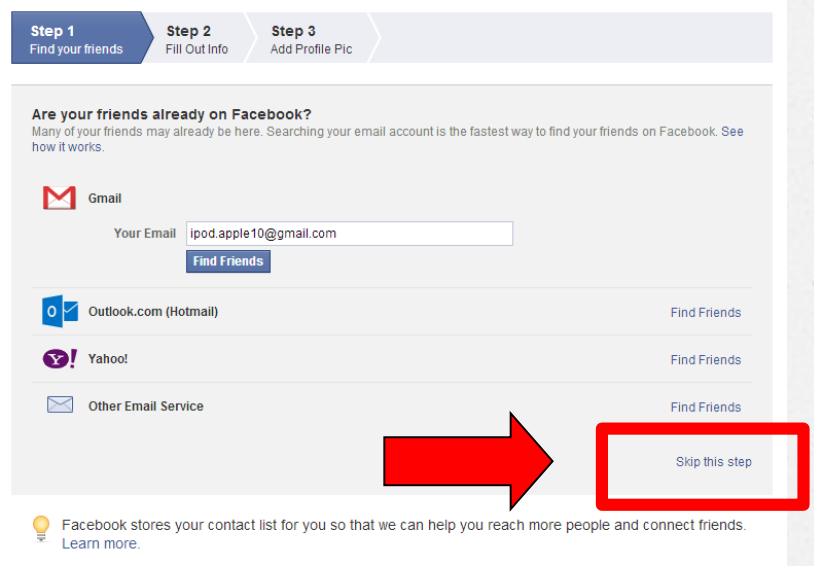


Setting Up a Facebook Account Step 3

- Go to your email account and click on the link inside the message that Facebook sends you.
- If you need help with this step, please call over an instructor.

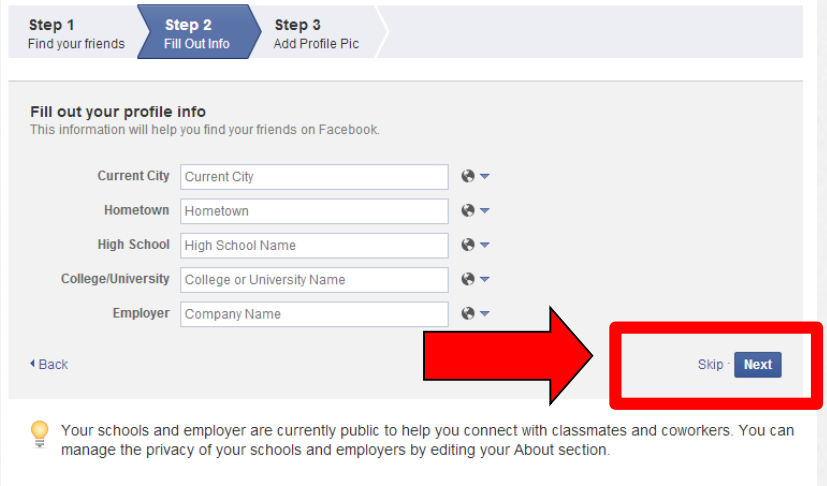
Setting Up a Facebook Account Step 4

- After verifying your email address, click the “Skip this step” on the bottom right hand part of the screen.



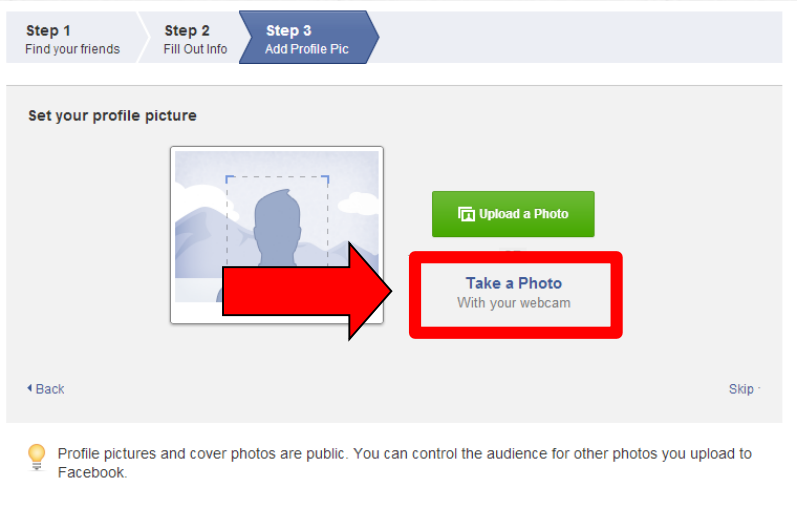
Setting Up a Facebook Account Step 5

- Here, if you want to fill out your info (like where you live, your college, etc.), fill it out and then click "Next."
- If you don't want to fill it out, click "Skip."



Setting Up a Facebook Account Step 6

- Now, you will want to make your profile picture (the one all of your friends will see of you).
- To do this, ask the volunteers for the best way to do this.



Adding Friends

Facebook

Adding Friends

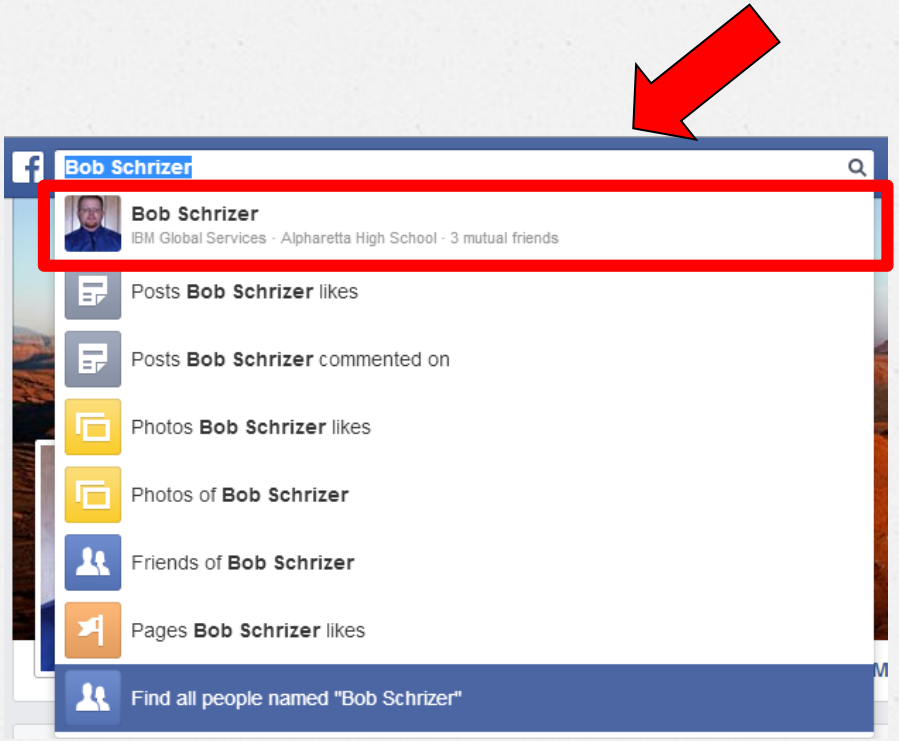
- The core of Facebook involves “friends.” Friends are people who you know in real life and befriend online through Facebook.
- By becoming a person’s Facebook friend, you can see all of their posts that they make and can message them to talk.

Adding Friends Step 1

- Before adding a person as a friend, you need to find them. To do this, go to the search bar at the top and type in a person's name that you want to look for.

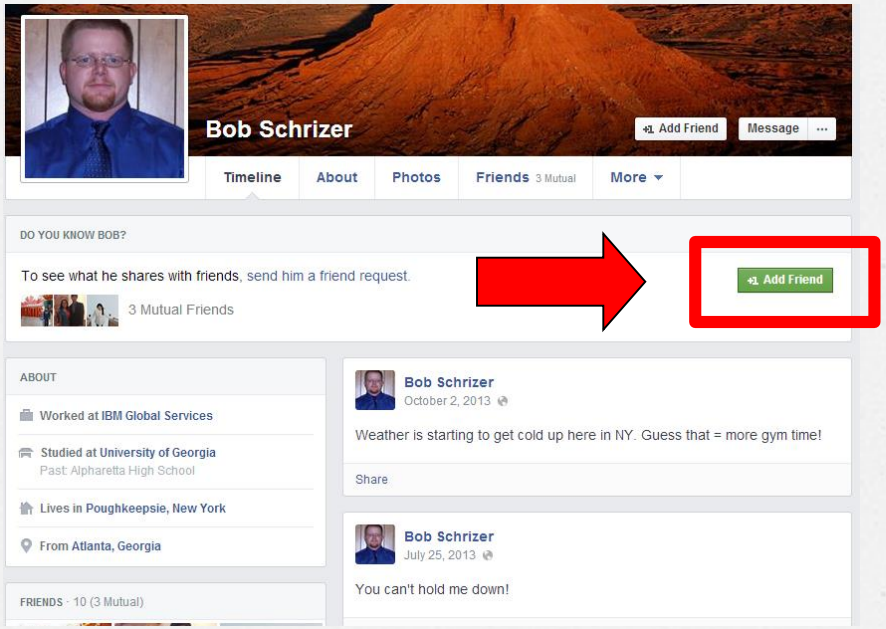
Adding Friends Step 2

- Once you see the person you are looking for in the results, click on his or her name.



Adding Friends Step 3

- After viewing the person's profile to make sure it's the right person, click the green "Add Friend" button.

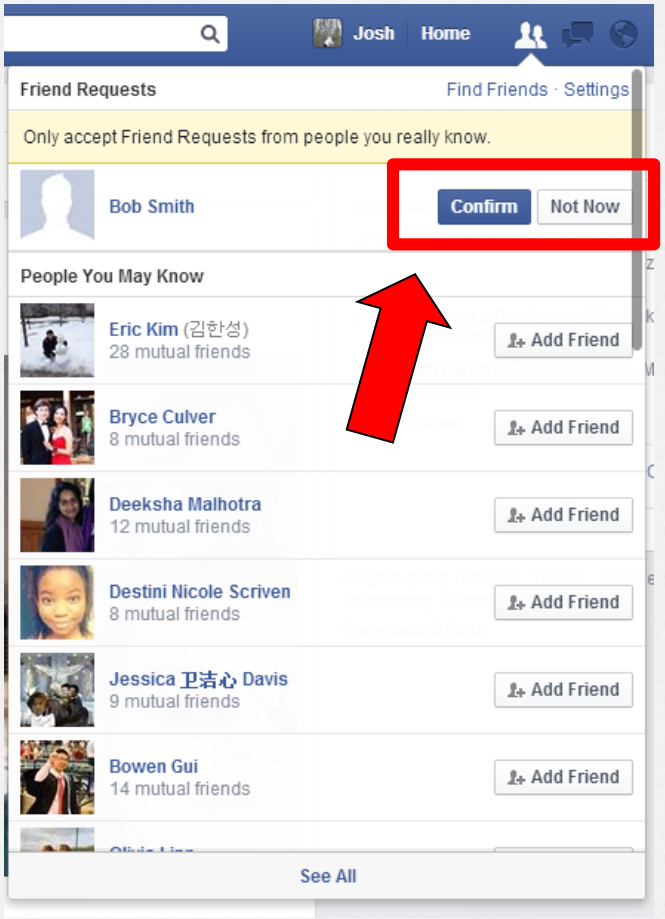


Adding Friends Step 4

- Note that once you click this button, you are not automatically friends. Clicking this button will send a message to the other person asking if he/she wants to be friends with you.
- If he/she accepts, you will get a notification back saying that you are now friends

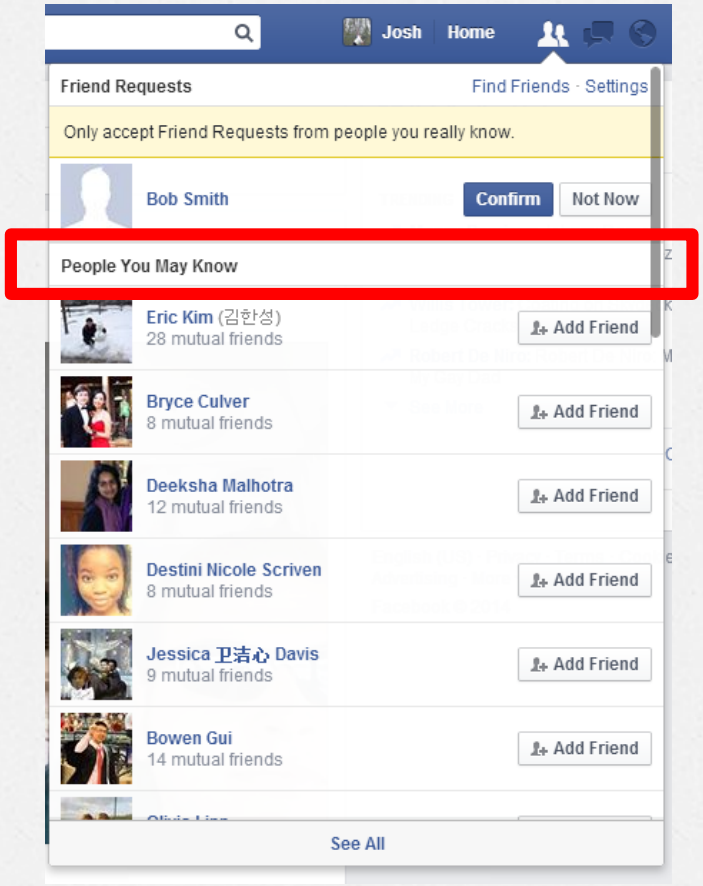
Adding Friends Step 5

- Other people can also send *you* friend requests. Make sure you **only accept friend requests from people you know in real life.** The screen will look like this (you can "Confirm" or "Reject" the request).



Adding Friends Step 6

- If you want to add more people but don't know who, look at the "People You May Know" section under friend requests.
- This will give you possible people you might know; again, only send requests to people you know in real life

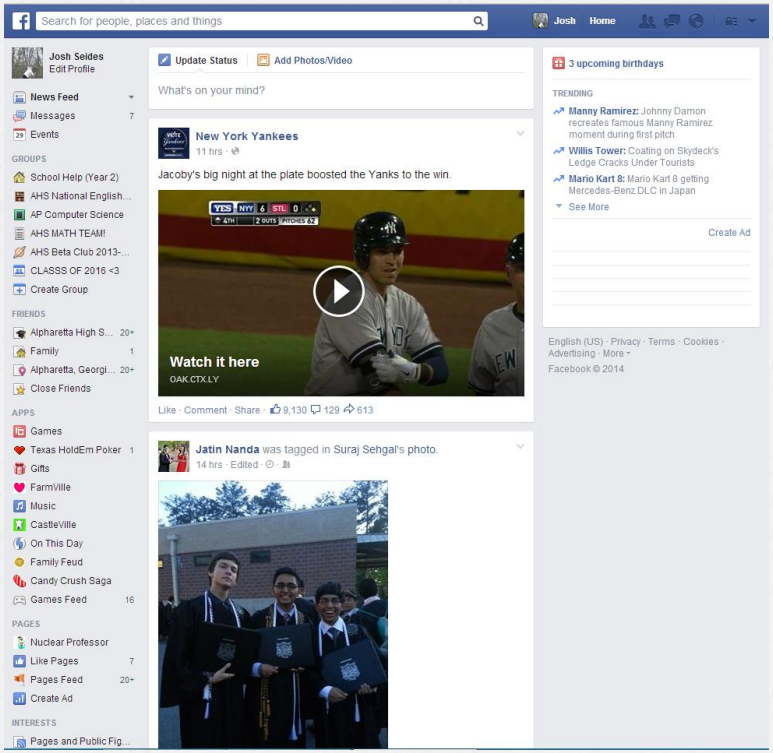


The Feed

Facebook

The Feed

- The “Feed” is the place where you can see pictures and posts by your Facebook friends.



The Feed Step 1

- Whenever you see someone else's post, you can **like** it by clicking the "Like" button or **comment on it** by clicking the "Comment" button.

The Feed Step 2

- All of the posts on your “Feed” are ordered in chronological order, with the newest ones being on the top. You can continue to scroll down to **see all the posts** your other friends have made.

Posting

Facebook

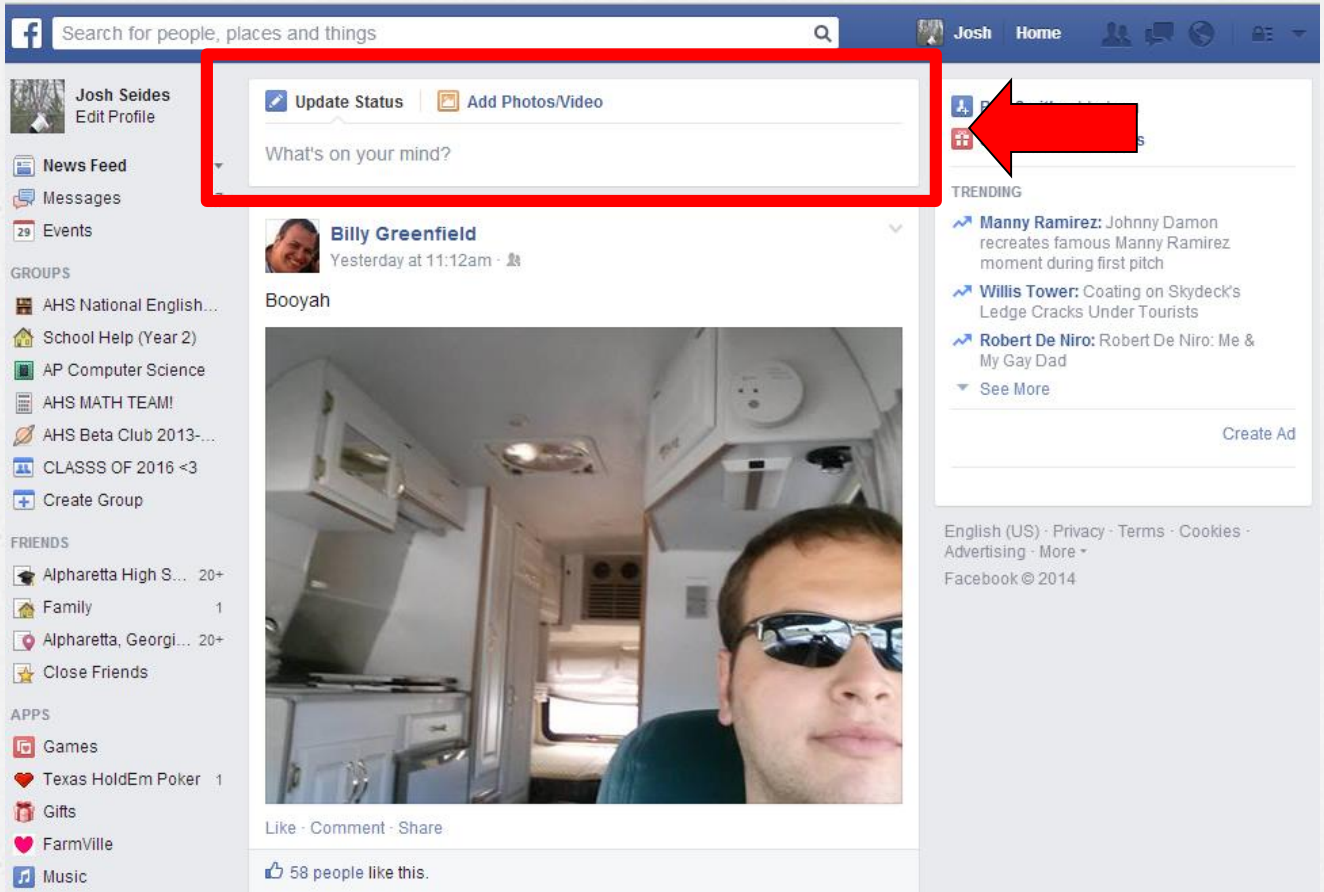
Posting

- Once you build up a solid base of friends on Facebook, you can begin to post things to your wall for them to see.
- Messages
  - You might want to exclaim a recent interesting television show you watched or game you played.
- Photos
  - You may want to post some pictures of your family for your friends to look at.

Posting Step 1

- If you want to **make a post that consists of a single message** like “Today was a great day with Technocademy!,” you will simply type your message in the “What’s on your mind?” box on the top middle part of the screen.

Posting Step 1, cont.



Posting Step 2

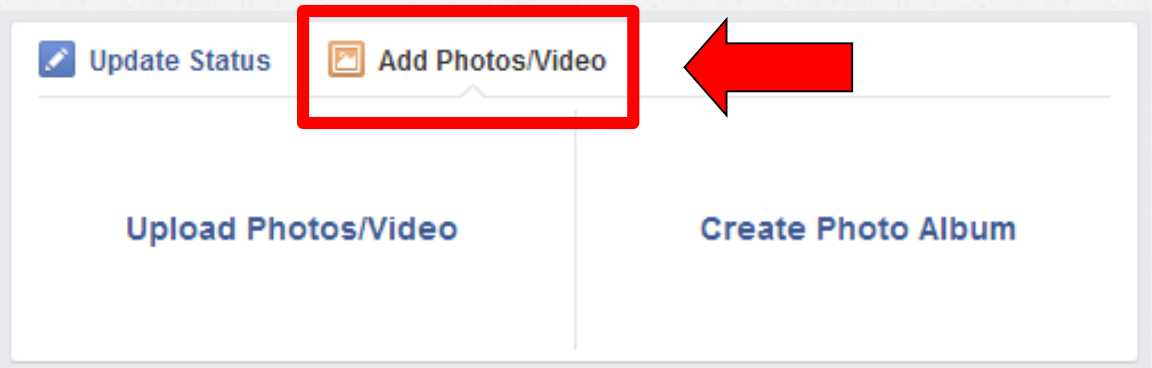
- You type your message and then when you are done, click the “Post” button in the bottom right hand part of the box.

Posting Step 3

- You can also **post for example a picture/video of something you did or someone you were with.** First, click the “Add Photos/Video” button in the top middle part of the screen.
- See the picture on the next page!

Posting Step 4

- Then click on the appropriate button (video or photo) and then upload it. If you need help on how to upload, please call over an instructor.



Posting Step 4

- And now, your post has been uploaded! Your friends on Facebook can now view this post. It is possible that they will comment on it or even like it.
- If either of these actions occur, you will be notified in the upper right hand part of your screen so you can respond.

Private Messaging

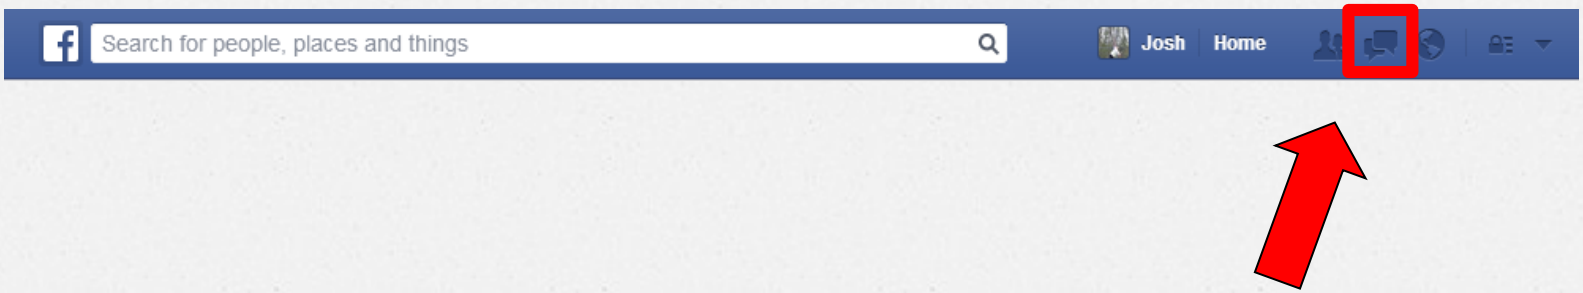
Facebook

Private Messaging

- This is similar to email in that you are sending messages one-on-one to another person; however, this is much faster.
- This is **very** similar to texting.

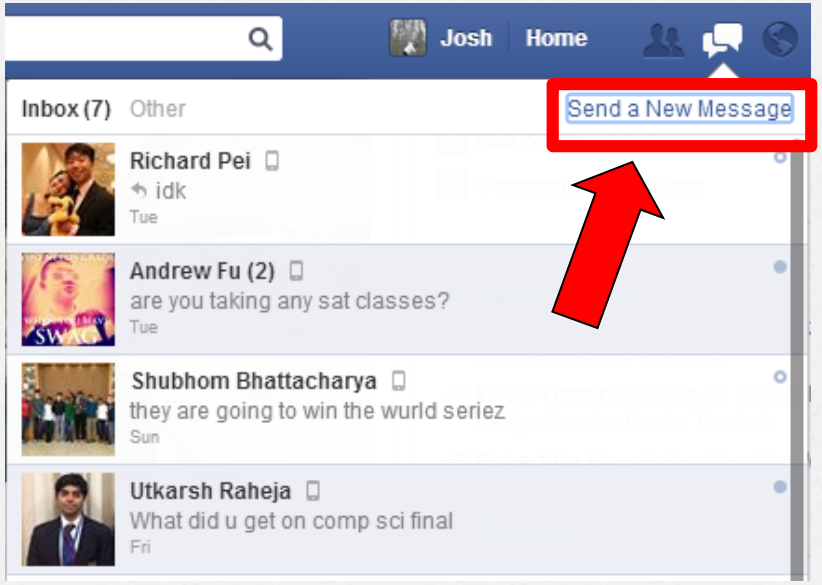
Private Messaging Step 1

- First click on the message bar on the top blue part of the screen.



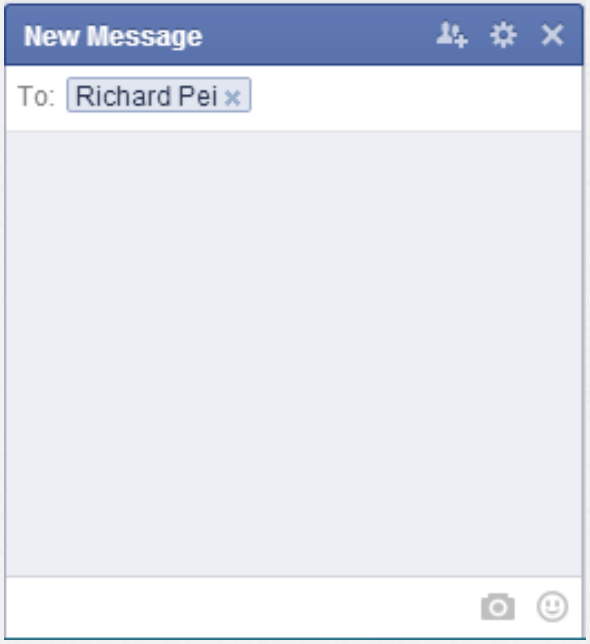
Private Messaging Step 2

- Once you click this you can begin a new message with a friend by selecting the **"Send a New Message"** button.



Private Messaging Step 3

- Now there will be a box at the bottom that appears. This is a similar format to the email screen. It will ask you for the recipient (in the “To” box) and what your message is (in the bottom white part of the box).



Private Messaging Step 4

- After you type a message, click the **"Enter"** button on your *keyboard* to send.
- Your message will now send to the other person. Once that person messages back, you will receive a notification on your computer.
- From there, you can continue to have a conversation back-and-forth.

Safety

Facebook

Facebook Safety – Adding Friends

- As a general rule, do not accept friend requests from people you do not know. When people send you friend requests, you can see their name. If you do not personally know for sure who this person is, do not accept the request.
- Similarly, do not send any friend requests to people you do not know personally outside of Facebook.

Facebook Safety – Adding Friends, cont.

- Only add friends that you are comfortable seeing with them seeing your profile and wall.
- *Never* accept a friend request or engage in private message conversation with someone you do not know personally outside of Facebook.

Facebook Safety - Posting

- Do not at any time post your location or personal information in a post.
- Do not post information like your credit card information or passwords to your email or Facebook accounts.
- Do not respond to private messages form people you do not know in real life.

Summary

- For a quick wrap-up of the material you may need in the future, please refer to the “Creating a Facebook Account” and “Interactions in Facebook” handouts.

Questions?

Thank you!

- If you ever have any questions regarding social media or any other topics, please feel free to send an email to:
